Chengdu, known as *Rong (Hibiscus)* for short, is the capital of Sichuan Province. Depicted by an ancient poet as “Out of the heaven is born the city of Chengdu, a picturesque land dwelled by tens of thousands of lovely households”, the city is now the consumption center of western China, a center for life in southwest China, a National Central City and an emerging world city. It is also a national center of economy, science and technology, finance, culture and creativity, and international exchanges, and an international comprehensive transportation and communications hub. The city covers an area of 14,300 square kilometers and has jurisdiction over 20 districts (cities)

and counties as well as the Tianfu New Area (Chengdu) and Chengdu High-tech Zone. It has a registered population of 14.76 million, a permanent population of 16.33 million and a service population of 21.83 million. In 2019, Chengdu's GDP is expected to exceed 1.7 trillion yuan, and its economic growth rate is estimated to remain above 8% for 12 consecutive quarters.

2018年春节前夕，习近平总书记视察四川时明确提出“支持成都建设全面体现新发展理念的城市”，为新时代成都发展指明了前进方向。成都坚持以习近平新时代中国特色社会主义思想 and 习近平总书记对四川及成都工作系列重要指示精神为指引，以新思想引领城市发展方向，以新发展理念统揽城市工作全局，坚决贯彻落实省委“一干多支、五区协同”“四向拓展、全域开放”战略部署，深化改革开放，聚力创新发展，确立了新时代成都“三步走”战略目标和“国家中心城市、美丽宜居公园城市、国际门户枢纽城市和世界文化名城”战略定位：到2020年，高标准全面建成小康社会，基本建成全面体现新发展理念的国家中心城市；到2035年，加快建设美丽宜居公园城市，全面建成泛欧泛亚具有重要影响力的国际门户枢纽城市；到本世纪中叶，全面建成现代化新天府，成为可持续发展的世界城市。

Before the 2018 Spring Festival, General Secretary Xi Jinping made it clear during his visit to Sichuan that Chengdu will be supported to turn into a city that fully embodies the new

development philosophy, pointing out the way for the development of Chengdu in the new era. Adhering to Xi Jinping Thought on Socialism with Chinese Characteristics for a New Era and guided by his important instructions on the development of Sichuan and Chengdu, Chengdu practices Xi's new idea for its development, plans the overall urban development with the new development philosophy and resolutely implements the strategic deployment of "One Main Pillar and Multiple Pivots, and Coordinated Development of the Five Economic Zones" "Four-Directions Expansion and All-Fronts Opening-up" made by the CPC Sichuan Provincial Committee. Determined to deepen reform and opening up, and push for innovation-driven development, Chengdu has pinpointed its strategic positioning as a National Central City, beautiful and livable park city, international gateway and hub city and world famous cultural city, and has established its three-step strategic goal for the new era: by 2020, a well-off society will be built in an all-round way with high standards, and a National Central City that fully embodies the new development philosophy will be mostly accomplished; by 2035, the construction of a beautiful and livable park city will be accelerated and the building of a pan-European and pan-Asian international gateway and hub city with

Building Chengdu as a National Central City. Grasping the historical rising opportunity offered by national rejuvenation

and to upgrade the city in all aspects, we optimize the spatial structure of the city by building a differentiated development pattern of “East Advancement, South Expansion, West Control, North Revitalization and Central Optimization”, pushing for eastward development beyond the Longquan Mountain, building a modern and futuristic new city facing the world in the east, and starting a millennium change of the city outlook from "a city contained by two mountains" to "a city connected by one mountain"; we reshape the economic geography of the city and reform the city management system by breaking the former “three-tiered” urban structure and forming a new special pattern of “urban core+ satellite new cities”. We push for high-quality development by establishing and improving the high-quality development policy system with the “System Reform of Five Sectors” as the core , building an open and modern industrial system that is supported by five advanced manufacturing industries, five modern service industries and the new economy, and promoting the formation of an economic work organization mode that takes industrial functional areas as the carrier, ecosystem and innovation chain as the core and projects as the center. As a result, the new economic vitality index of Chengdu now ranks third in the country. We will resolutely implement the

important strategic deployment made by the CPC Central Committee on the construction of the Chengdu-Chongqing economic circle, accelerate the integrated development of Chengdu, Deyang, Meishan and Ziyang, promote the coordinated development of Chengdu Plain Economic Zone and the synergized development of the five major economic zones, thus building a regional development community of shared benefits. Building Chengdu as a beautiful and livable park city. We fully implement the park city concept first put forward by General Secretary Xi Jinping during his visit to Tianfu New Area by tackling smog with tough measures, reducing traffic congestion with scientific methods, treating water pollution with a heavy punch and increasing the green space across the city and by planning and constructing the world's longest 16,900-kilometer Tianfu greenway system and the world's largest Longquan Mountain Urban Forest Park as the “green heart” of the city. We take Tianfu Jincheng Park, Jiaozi Park and Luxi Smart Valley as examples to create six types of park-scenes, and strive to restore Chengdu to its magnificent past, being ornamented by greeneries and flowers and well nourished by waters. We vigorously develop the life service industry by setting up specialized companies in the field of people's livelihood, and expanding the high-quality supply of public services. We build

the network of urban rail transit in rapid pace by implementing TOD and with accumulated mileage of rail transit in Chengdu up to 341 kilometers. We also implement the “Ten Major Projects” and “Five Major Reforms” for the rural rejuvenation, promote the protection and restoration of Dujiangyan key irrigation area and western-Sichuan-style Linpan settlements and the reconstruction of the landscape, highlighting the great beauty of poetic dwelling. Building Chengdu as a world-famous cultural city. Immersed in the tranquility of nature, Chengdu is well-known for its profound history and splendid culture. Boasting more than 4,500 years of civilization history and more than 2300 years of history as a city, it has been eulogized as the Land of Abundance

since ancient times. World natural and cultural heritages such as Mount Qingcheng and Dujiangyan Irrigation System, Sichuan Giant Panda Sanctuaries as well as cultural relics such as Wuhou Shrine, Du Fu Thatched Cottage and Jinsha Site, are renowned both at home and abroad. Sichuan Opera, Shu Embroidery and many other intangible cultural heritages have been passed on for thousands of years. Therefore, Chengdu has been awarded one of the Best Tourism Cities in China. Adhering to the principle of nurturing the people and city with culture, Chengdu vigorously promotes Chinese culture, inherits Bashu civilization, and develops the Tianfu culture featuring “Innovation and Creation, Elegance and Fashion, Optimism and Inclusiveness, Friendship and Public Welfare”. We push for the construction of a world-famous city of culture and creativity, tourism, and sports, as well as an international capital of gastronomy, music, convention and exhibition. By promoting the integrated development of agriculture, commerce, culture, tourism and sports, building the city as an international consumption center, planing and building a number of cultural landmark projects that embody Chengdu's cultural characteristics and city spirit, such as Tianfu Art Center, Panda Planet, Tianfu Olympic Sports City, etc., we aim at bringing out the unique humanistic charm of

Chengdu. We are now busy preparing the 31st FISU Summer World University Games in 2021, the 56th World Table Tennis Championships in 2022, the 18th AFC Asian Cup in 2023 and the 2025 World Games. Taking the culture as the medium and sport games as the window, Chengdu is embracing the world with greater openness and confidence.
